

PT-BIO-02
Agricultura UE

infusoescomhistoria.pt

Founded in 2017, the brand breathes the pure mountain air and harvests the raw materials that are at its origin from nature. This was the inspiration of Valdemar Sousa and Miguel Moreira, who wanted to preserve the Portuguese legacy based on indigenous products, tracing two distinct routes through the north of Portugal: the Romanesque and Douro regions. The map unfolds from here, with the certainty that there are many trails to explore.

More than a product, the brand Infusions with History aims to recover the legacy of Portugal and awaken sensorial experiences, with a mission: Valorization of the territory, its products and the producers.

Sustainability and fair trade are fundamental pillars in all production, so that history continues. A small contribution to the world that we want to help preserve.

Sold in the online store, Infusions with History wants to diversify its audience through pairing with gastronomy,

in partnership with some of the best chefs and sommeliers. The objective is to assume itself as an option for wine. From the beginning to the end of the meal, an experience that it wants to multiply next year and position itself on the menus of top restaurants, alongside the most famous labels, because it is the terroir and savoir-faire applied in the blends that make the brand unique.

All infusions are obtained through the traditional drying process of the plants and bear the BIO, kosher certifications and the Portugal Sou Eu seal. In 2020 and 2021, Infusions with History won seven prizes in the international competition Les Thés du Monde, organized by AVPA - Agence pour la Valorisation des Produits Agricoles, in Paris, obtaining the highest distinction, the "Gourmet Or" for Inspiring Infusion, from the Douro Blends range.
